

FULL LED HEADLIGHT UNIT

Dear user, thank you for choosing an EVOK product!

For a correct connection of your new EVOK Full Led Headlight unit, we recommend you to read this leaflet carefully. The package includes a voltage converter, necessary for the correct functioning of the item;

it has a double function, both of conversion from 6V to 12Vcc and from 12Vac to 12Vcc.

We therefore recommend the installation of the converter even on already 12V systems, in order to guarantee a stable current flow and a longer life of the EVOK optical unit.

Thanks to the converter it is also possible to install the LED headlight on Pins ignition systems.

(PHOTO 1, Voltage converter)

Start with the connection of the headlight and the electrical system to the voltage converter, respecting the following instructions:

CODE 246410291 FOR PIAGGIO CIAO
